**Keyword Searching**

Start a keyword search using the terms:

**diabetes and education**
Check here to see the **total number of articles** returned and the search terms used.

2. Sort options (RELEVANCE, DATE, etc.)

3. Hover on the magnifying glass to see snapshot of the abstract OR click on title to go to the full record for each article.

4. Apply limits to refine this search. **(NOTE: A wider selection of limits is available on under Advanced Search.)**

5. Click icon to immediately access full text PDF or HTML documents when available.

6. If full text documents are not available in CINAHL, click on the **FIND IT** button to use other options for obtaining full text.
CINAHL Full Record Page

1. Publication type will indicate the type of article (e.g. randomized control trial, systematic review, meta-analysis, editorial, etc.).

2. Major Subjects list the main CINAHL Headings used to describe the subject of each article. Click on individual headings to run a search for more articles about that subject.

3. Use this link to email this article, including the full text if available.

4. Use this link to view a citation of this article in a variety of formatting styles, including APA 6th edition.

5. Be sure to check out the other tools available when you locate a useful article.
① Click on CINAHL Heading to browse subjects.
② Enter search terms to locate CINAHL Headings. (Example: Diabetes Education)
③ Check the box to select one or more subjects to add to a database search.
④ Check the box for Major Subject if desired and click Search Database.
⑤ Click here to browse for additional CINAHL Headings to add to this search.
Using Limits in Advanced Search

1. When you limit to full text only, you may miss relevant articles that are not available in the database but are available using the FIND IT button.

2. **Publication Type** is very useful! Do you need to locate a Systematic Review or a Randomized Controlled Trial? Limit your search results to the specific article type you want to find.

3. Limit to **Evidence Based Practice** to return search results for this special interest area.

4. Limit to articles specific to one gender or age group.
